INTERNATIONAL NURSES DAY CELEBRATION 2023

A warm good morning to one and all gathered here. I Ms. Sumana Yesu Priya SH, Assistant Professor stand with a warm privilege to welcome you all to celebrate "International Nurses Day" & birth anniversary of Public Health Pioneer "Florence Nightingale".

International Nurses Day each year carries a theme and theme for the year 2023 is "Our Nurses: Our Future".

I invite all the dignitaries to occupy the dias. (Movie display)

"As a nurse we have the opportunity to heal the soul, mind, heart and body of our patient. They may forget your name but they never forget how you made them feel"

DIGNITARIES ON DIAS

Ms. Florence Nightingale was born on May 12, 1820, in Florence, Italy who was a British nurse, social reformer and statistician best known as the founder of modern nursing. Her experiences as a nurse during the Crimean War were foundational in her views about sanitation. In addition to writing over 150 books, pamphlets and reports on health-related issues, she is also credited with creating one of the first versions of the pie chart. However, she is mostly known for making hospitals a cleaner and safer place to be.

Ms. Florence gained the profound Nobel award 'The Lady with the Lamp' during her work in World War II at Scutari. 'The Times' reported that at night she would walk among the beds, checking the wounded men holding a light in her hand. The image of 'the Lady with the Lamp' captured the public's imagination and Florence soon became a light for the wounded. Florence returned to England in August 1856. In the years that followed, she continued to campaign for the reform of nursing and for cleaner hospitals.

INVOCATION

I would like to call 4th year B.Sc(N) Students of SDUCON for the invocation song.

Significance of Nurses Day

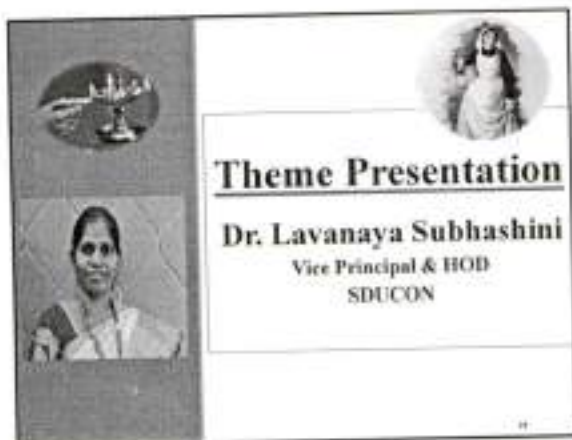

Born on 12 May 1820 in Florence Italy
Died on 13 August 1910 in East Villa, England

In 1857 Nightingale felt that God was calling her to do some work for which she was not well qualified to do.

Florence encouraged her decision to enter nursing in 1844, she worked hard to educate herself in the art and science of nursing despite opposition from her family.

During Crimean war, caring for soldiers, proved death rates decline from 42% to 2.5%.
